

Supported Printers

 **LINGA POS SUPPORT**

Supported Printers

- We offer full support for printers available on our [shopping website](#). They have all been tested with Linga POS.
- There are some other printers from Epson and Bixalon that may work with Linga, but we do not guarantee they will work.
 - Testing: If a merchant wishes to use alternative printers, they should let support know early and allow an extra two weeks for us to test compatibility.
 - Connection: Serial printers of any kind will not work with our system. The printer must be IP-based (uses an ethernet cord) we do offer a Bluetooth solution that has been tested and proven to work.
- Star brand printers may be compatible if DIP settings are changed. HOWEVER, we do not support Star at all and we offer limited support on implementation.
 - We will forward a set up document that a customer or partner may follow, but that is the extent of our assistance with Star printers.
 - See the **Star Printer DIP Guidelines** supporting material for compatible printers and settings.
